Experiment 15

Title: Create and Restore a Snapshot of a Virtual Machine

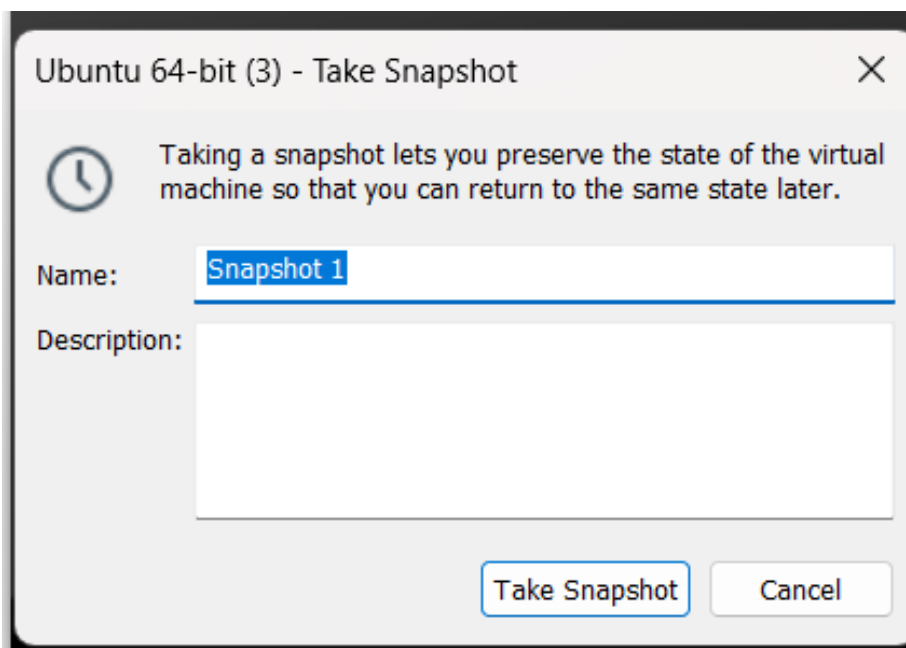

Aim

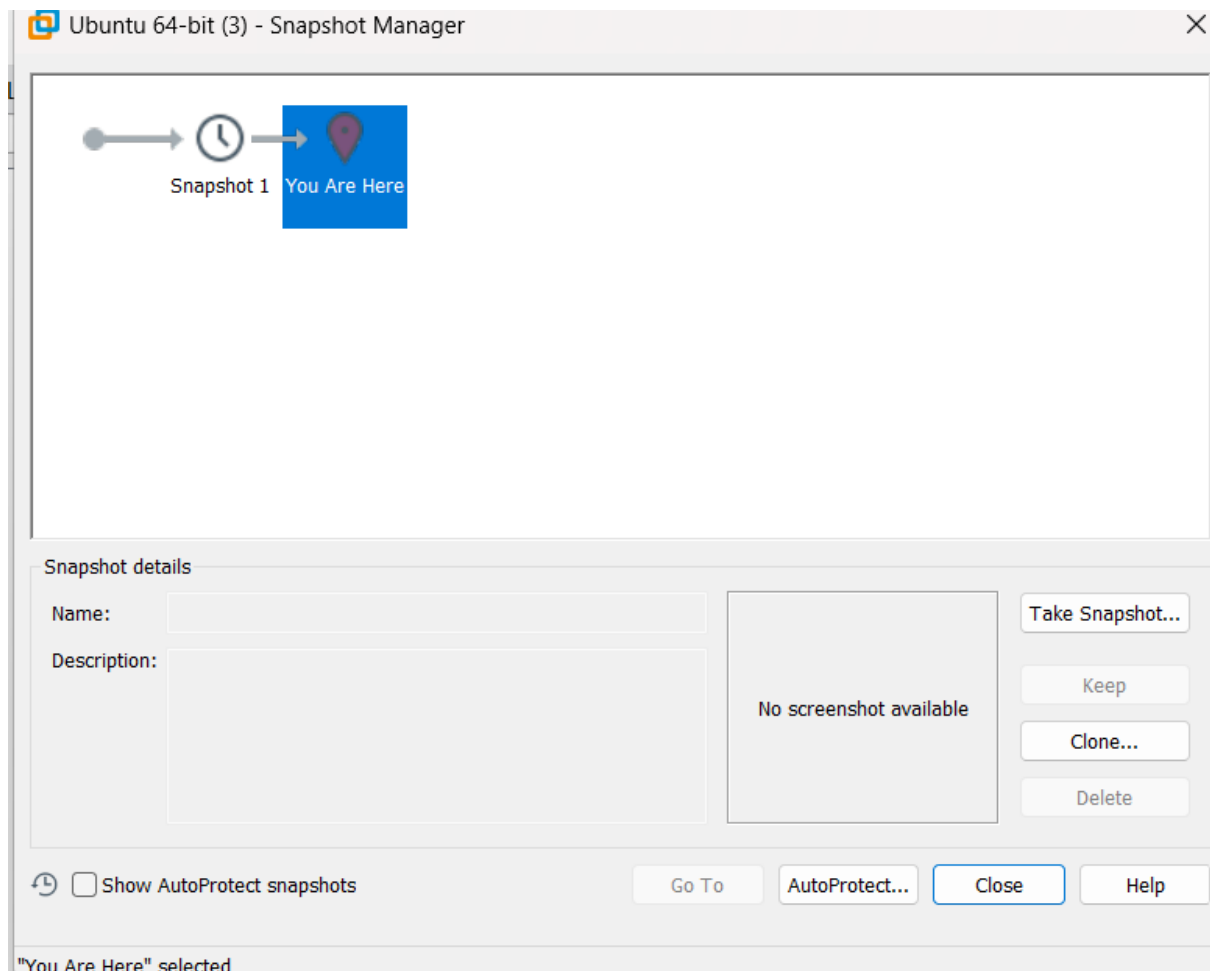

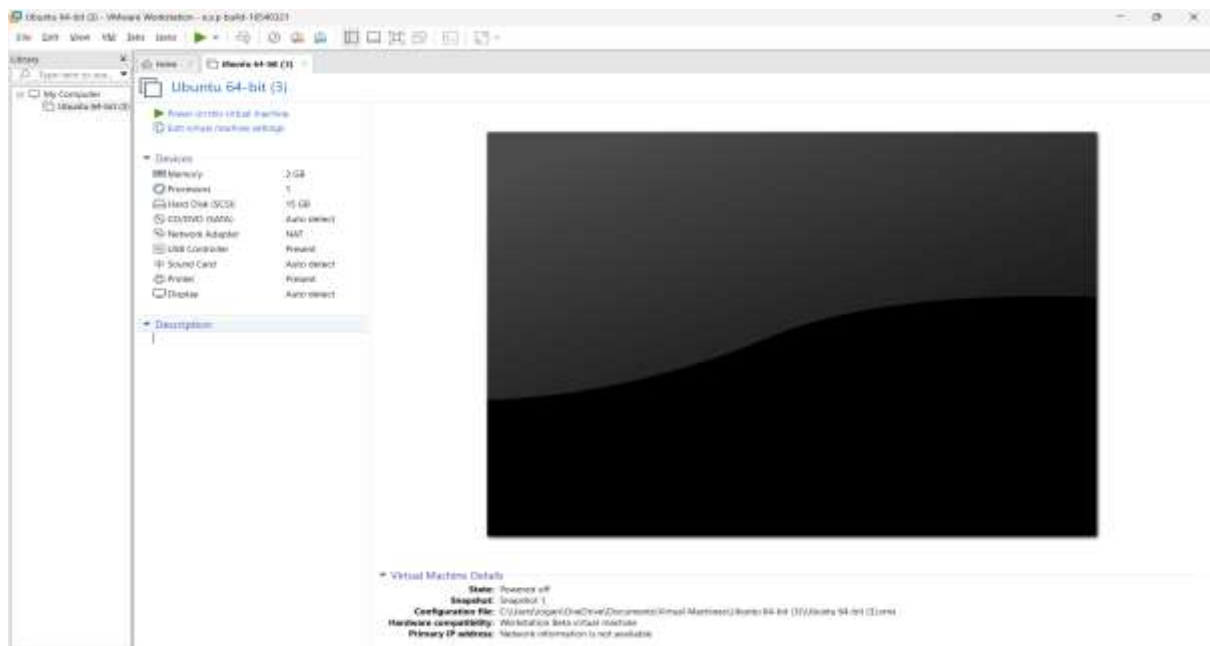

To create a snapshot of a Virtual Machine and restore it to the previous state.

Procedure

1. Start the Virtual Machine.
2. Install any software or create a sample file.
3. Go to **VM → Snapshot → Take Snapshot**.
4. Enter a snapshot name.
5. Click **Take Snapshot**.
6. Make changes inside the VM (delete files or install another application).
7. Go to **VM → Snapshot → Snapshot Manager**.
8. Select the previously created snapshot.
9. Click **Go To** or **Restore**.
10. Verify that the VM returns to its previous state.

Output

Result

The snapshot was created successfully, and the Virtual Machine was restored to its previous state without errors.
